

# Explore the Data Inside of FiberLocator

When executing fiber infrastructure projects, compiling information from every carrier can be time-consuming and daunting. Research can take hours, limiting the time you can spend on other components of your project.

Save time with FiberLocator – a repository of information where you can find all the fiber data you need in one location.

FiberLocator houses hundreds of fiber maps and over a million lit buildings and thousands of data centers. FiberLocator currently has data from over 300 unique carriers, with over 1,600,000 carrier records!

BUT - did you know FiberLocator houses data from most of America's top carriers? According to Vertical System's most recent leaderboard, **eight** of the **top eleven** carriers have their assets published in FiberLocator – including AT&T, CenturyLink and Zayo! Members can see the data from these top carriers, as well as hundreds of other metro network and long-haul fiber providers.

## With FiberLocator services, you have access to:

- + Almost 400 map layers
- + Over 1.4 million lit building unique address records
- + More than 700 unique lit building carriers
- + Close to 4,100 unique data center addresses
- + Upwards of 7,100 data center listings
- + Optional cell data with Premium Layers \*

## FiberLocator also houses submarine cable data:

- + 725+ landing stations, located in 188 countries
- + More than 275 cables from 261 operators
- + Over 932,000 miles of cable with a total bandwidth of 1.178 Pbps

## YEAR-END 2018 U.S. FIBER LIT BUILDINGS

Rank Fiber Providers

1	AT&T
2	Verizon
3	Spectrum Enterprise
4	CenturyLink
5	Comcast
6	Cox
7	Crown Castle Fiber
8	Frontier
9	Zayo
10	Altice USA
11	Windstream

### CHALLENGE TIER (in alphabetical order)

Atlantic Broadband | Cincinnati Bell | Cleareon | Cogent  
Consolidated Communication | FiberLight | FirstLight  
GTT | IFN | Logix Fiber Networks | Segra  
United Private Networks | Uniti Fiber

Rankings based on lit fiber at U.S. commercial building

Our data sets are always evolving, as our goal is to deliver the **most up-to-date, accurate information** to FiberLocator users.

We're constantly looking to add even more information to our platform. We encourage our members to **suggest data**, and for carriers to submit their updated information.

FiberLocator is an invaluable resource guide for developing a custom fiber network, planning data center sites, and locating on-net buildings.

**FiberLocator allows users to:**

- + Research fiber providers, carrier lit building locations, and data centers.
- + Save time and have increased accuracy of fiber information.
- + Create professional outputs for presentations and proposals.

**Identify optimal fiber networks and get the market intelligence you need to stay ahead of competitors!**

Visit **FiberLocator.com** for additional information or to request a **free trial**.
